Food Security

TIG's motivation is the desire to contribute to global food security. This means that all people always have physical, social, and economic access to sufficient, safe, and nutritious food that meets their food preferences and dietary needs for an active and healthy life

We connect supply and demand and guarantee fair prices, ensuring that basic foodstuffs remain available to everyone, including the world's most vulnerable.

Connecting Networks

We use our network to create the best partnership for your company. Our goal is to keep the chain as short as possible, for the benefit of all parties.

This means that we also take care of the transport and shipping of the goods as much as possible, with our own logistics department. The fewer links, the more humane the operations. We build lasting relationships to help our clients become a force for positive change.
